**Fiscal Impact:** Upon execution, the total cost of the agreement is not to exceed $1,000,000 over five years to be used out of NCPA approved budgets as services are rendered. Purchase orders referencing the terms and conditions of the agreement will be issued following NCPA procurement policies and procedures.

**Fiscal Impact:** Total cost of the agreement is not to exceed $1,500,000 over five years to be used out of NCPA approved budgets as services are rendered. Purchase orders referencing the terms and conditions of the agreement will be issued following NCPA procurement policies and procedures.

16. Resolution 17-66, Amendment #1 to Aon Risk Services West Inc. Consulting Services Agreement – adopt resolution by all members approving an amendment (Amendment #1) to the Consulting Services Agreement with Aon Risk Services West, Inc.

**Fiscal Impact:** NCPA’s insurance program premiums and brokerage fees are budgeted as part of the aggregate Property, Liability, and Workers Compensation insurance cap estimates, which are charged off proportionately at approximately 80% for Property Insurance and 20% for Liability Insurance based on total premiums paid. The fees and premiums in total are then allocated to projects based on insured values at each plant site, with the liability insurance charged to Administrative & General costs. The proposed cap of $25,000 does not have an immediate impact unless there are more insurance claims for Aon to administer. For the GRC inspection services, there is a $5,000 fee to administer this program, which is already included in the FY2017-18. No additional budget request is needed to approve these amendments.
17. Resolution 17-64, Delegate to the General Manager authority to enter into one or more agreements, with a total not to exceed for all agreements of $2,500,000 for repair, restoration and/or replacement of portions of the Beaver Creek Reservoir and related facilities at the NCPA Hydroelectric Project – adopt resolution by all members delegating the General Manager authority to enter into one or more agreements, with a total not to exceed for all agreements of $2,500,000 for repair, restoration and/or replacement of portions of the Beaver Creek Reservoir and related facilities at the NCPA Hydroelectric Project.

**Fiscal Impact:** Annual average hydroelectric generation attributable to the Beaver Creek Dam is approximately $1,700,000.

The Project is currently estimated to cost less than $2,500,000. As of May, 2017, the costs were estimated at $1,000,000; however, Staff Report 159:17 noted that “If the projected Project costs increase as the work proceeds, staff will return to the Commission for additional authorizations as may be necessary.”

In February 2017, the NCPA Commission passed Resolution 17-16 finding and declaring a state of emergency with respect to the NCPA Calaveras Hydroelectric Generation Project and authorizing the General Manager to take such steps as necessary to obtain funds to maintain, repair, restore, or replace the project. Staff has notified the Federal Emergency Management Agency (FEMA) and NCPA’s insurance broker of the 2017 loss. In a letter dated June 13, 2017 NCPA’s Insurance Underwriters indicated that coverage is afforded for damages to the dam structure, tunnel, penstock, and associated equipment at the Beaver Creek Diversion dam, but that no coverage is afforded for land including the upstream creek which has built up sediment. Discussions are ongoing with the Insurance Underwriters to further clarify the extent of coverage specifically for this project. NCPA’s insurance deductible is $500,000. In similar Beaver Creek storm-related sedimentation historical losses, NCPA received FEMA reimbursements due to the 2006 flood incident, but not due to the 1997 incident. FEMA requires that the applicant demonstrates that it first pursued insurance reimbursement prior to FEMA providing funding. FEMA reimbursement looks favorable for a substantial part of the non-insurance project costs.

To date, $550,000 has been collected for Beaver Creek Sediment removal as part of ongoing Hydroelectric Project Capital Development Reserve funding. An additional $125,000 is proposed for collection as part of the FY18 budget, resulting in a total of $675,000 available after July 1, 2017. Remaining needed funds are proposed to be drawn from the McKays Cleanout Capital Development Reserve Account and/or the Hydroelectric Project Maintenance Reserve Account. Both funds can be refunded by FEMA or insurance reimbursements if they ultimately materialize.
