Generation Costs & Reliability

Combustion Turbine Project

Availability/Production for March

Unit	Availability		Production		Reason for Run
CT1 Alameda	Unit 1	Unit 2	Unit 1	0.0 MWhr	CAISO / CAISO
	100.00%	87.85%	Unit 2	90.4	
Curtailments & Outages			None. / 3/17/17 - 3/22/17 Alameda Unit2 exhaust gas temperature issues.		
CT1 Lodi	65.32%		0.0 MWhr		No Runs.
Curtailments & Outages			3/6/17 - 3/17/17 Maintenance Outage.		
CT2 STIG	100.00%		791.5 MWhr		CAISO
Curtailments & Outages			None.		
LEC	98.15%		7,085.7 MWhr		CAISO
Curtailments & Outages			3/11/17 - Inlet Guide Vane Actuator Failure. 3/31/17 - Forced out due to White Slough Waste Water outage.		

Maintenance Summary – Specific per asset above.

Geothermal Facilities

Availability/Production for March

Unit	Availability	Net Electricity Generated/Water Delivered	Out-of-Service/Descriptors
Unit 1	91.70 %	19,107 MWh	Unit 1 had one outage for the month. The unit was removed from service for a scheduled outage on 2/27 at 0400 for a PG&E line outage, Stretford System cleaning, electrical trip test and other misc. work. The unit was returned to service 3/3/17 at 1345
Unit 2	91.63 %	19,158 MWh	Unit 2 had one outage for the month. The unit was removed from service for a scheduled outage on 2/27 at 0400 for a PG&E line outage, Stretford System cleaning, electrical trip test and other misc. work. The unit was returned to service 3/3/17 at 1345
Unit 3	N/A %	N/A	Unit 3 remains out of service for the month of February.
Unit 4	67.74 %	17,883 MWh	<p>Unit 4 had four outages for the month.</p> <ul style="list-style-type: none"> The unit tripped on 3/6 at 0730 due to a temp loss of power to the overspeed protection device. Power was confirmed to the device and the unit was returned to service the same day at 1420. The unit was removed from service on 3/7 at 0400 for a PG&E line outage and was returned to service on 3/8 at 2100. The unit was forced from service on 3/9 at 1100 to trouble shoot the number 2 turbine bearing. The unit was returned to service from its last outage with an elevated vibration reading. The unit was returned to service the same day at 1400. <p>The vibration issue remains and the unit will be scheduled out of service for repairs along with the scheduled steam line replacement job that was planned for the near future.</p> <ul style="list-style-type: none"> The unit was removed from service 3/20 at 0400 for a turbine replacement, Stretford and main condenser cleaning, trip testing, main steam line replacement and other misc. work. The unit was returned to service 3/30 at 2300.
Southeast Geysers Effluent Pipeline	99.6 %	248.1 mgallons	Average flow rate: 5,665.1 gpm
Southeast Solar Plant	N/A	84,751 KWh	Year-to-date KWh: 174,469
Bear Canyon Pump Station Zero Solar	N/A	159,392 KWh	Year-to-date KWh: 319,666

Hydroelectric Project

Availability/Production for February

Units	Availability	Net Electricity Generated	Out-of-Service
Collierville Unit 1	100.00 %	80,388 MWh	CV #1 unit no reportable outages.
Collierville Unit 2	100.00 %	80,380 MWh	CV #2 unit no reportable outages.
Spicer Unit 1	100.00 %	1,840 MWh	NSM #1 unit no reportable outages.
Spicer Unit 2	100.00 %	1,816 MWh	NSM #2 unit no reportable outages.
Spicer Unit 3	100.00 %	324 MWh	NSM #3 unit no reportable outages.

Operations & Maintenance Activities:

- Monthly CMMS work orders
- USFS/NCPA annual Project Meeting
- Adit 4 Slide Pre-Bid Walk Down and Bid Acceptance
- Beaver Creek Road USFS approval for Bypass Construction
- Emergency Response Plan Drill and Training (Ebbetts Pass Fire Dept)

Environmental, Health & Safety (EH&S) Projects

Incident Reports

- There were no vehicle accidents, no recordable incidents, and no lost time accidents that occurred in March.
- Find below a Safety Report that highlights the following areas: recordable incidents and lost time accidents (LTAs) reported this period and this calendar year; the number of days since last recordable or LTA; the number of work hours since last recordable or LTA; and vehicle accidents reported this month and this calendar year. In September of 2012, Generation Services completed an internal audit of its records with the results reflected in this report and as updated through the payroll period ended March 18, 2017.
- The “CT Group” column reflects the combined safety numbers of all CT employees. Beginning with the November 2009 report, the CT Group Column also includes Lodi Energy Center staff.

March Generation Services Safety Report

	Hydro	GEO	CT Group *	NCPA HQ **

Data originates from OSHA logs, HR records and payroll information.
Days and Hours are calculated through pay period ended March 18, 2017.

Power Management/NCPA Market Results

Dispatch and Schedule Coordination

- NCPA Dispatch and Schedule Coordination Center safely, reliably, and economically schedules, monitors, and manages NCPA and NCPA member power resources and loads 24 hours per day, 7 days per week on a continuous basis. This process includes balancing MSSA loads and resources on a 5-minute basis, optimizing NCPA resources and minimizing ISO costs.
- NCPA MSSA Load Data:

Current Year 2017 Data

	March 2017		Calendar Year 2017	
	Peak MW	MWh	Peak MW	MWh
NCPA Pool	322.03 3/6 @ 1900	192,418	351.61 1/18 @1800	576,741
SVP	478.77 3/14 @ 1600	304,575	478.77 3/14 @ 1600	880,592
MSSA	792.42 3/14 @ 1600	496,993	792.42 3/14 @ 1600	1,457,333

Last Year 2016 Data*

- NCPA MSSA has a Deviation Band with the CAISO, which is used as a performance measure by the CAISO. The ability to stay within this Deviation Band is a measure of NCPA Dispatch's ability to balance the MSSA Loads and Resources on a 5-minute basis. The following NCPA Deviation Band Performance table includes all deviations, including deviations from unit forced outages, metering and load outages, COTP, Western, and WECC curtailments.

NCPA Deviation Band Performance

	March 2017	Calendar Year 2017
MSSA % Within the Band	91.62%	96.69%

- McKay's spilled intermittently throughout the month of March due to a combination of maximizing Spicer releases for Spicer storage management, and varying Collierville energy and A/S market awards/instructions.
- Peak spill approximately 2,000cfs on March 21 due to a storm event.
- Spicer Meadows:
 - No curtailments
- Geothermal Units:
 - February 27 @ 0400 – March 3 @ 1343, Unit 1 and 2 off line for PG&E Geysers 9 – Lakeville 230kV line outage & annual maintenance. Annual maintenance was rescheduled from later in March to coincide with the PG&E outage.
 - March 6 @ 0741 – 1422 Unit 4 off line due to control system trouble
 - March 7 @ 0359 – March 8 @ 2110 Unit 4 off line for PG&E Geysers 12 – Fulton 230kV line outage
 - March 9 @ 1100 – 1359 Unit 4 off line due to turbine vibration troubleshooting
 - March 20 @ 0400 – March 30 @ 2321 Unit 4 off line for turbine replacement due to vibration and annual maintenance. Annual maintenance rescheduled from April due to turbine vibration issue.
- Lodi Energy Center:
 - March 11 @ 0000 – 1347 plant o/s to replace IGV actuator
- Alameda CTs:
 - March 16 – March 19 Unit 2 failed to start for market awarded run on 3 occasions.
 - March 19 @ 1855 – March 22 @ 1519 Unit 2 o/s for replacement of atomizing air blower.
- Lodi CT:
 - March 6 – March 16 Unit o/s for annual maintenance
- Collierville Units:
 - March 9 @ 1200 – 1300, Units 1 & 2 derated for intake trash rack cleaning (tunnel burp)
- STIG:
 - No curtailments

Pooling & Portfolio Planning & Forecasting

- Actual NCPA Pool load of 192.4 GWh in March equaled 99.1% of the pre-month forecast of 194.2 GWh as weather dried and warmed over February.
- Pool load, at 53 GWh through the 9th is on pace to total 182.6 GWh in April , close to the forecast of 185.5 GWh though loads the month cover too brief a period to be truly representative of the entire month.
- The Lodi Energy Center (LEC) generated 1.3 of the forecasted 2.5 GWh in March for the pool as power values in the CAISO markets remained low while gas prices remained relatively high. Strong hydro and renewable generation continue.
- For the month of March, 5.26 inches of rain was recorded at Big Trees gage. The March average Big Trees precipitation is 8.16 inches.
- The Value of Storage (VOS) of New Spicer Meadow Reservoir (NSMR) has been reduced to \$0/MWh (seeking net positive value between energy and A/S revenues) from \$10/MWh.
- NSMR storage as of March 31 was at 115,898 acre feet. The historical average NSMR storage at the end of March is 759,167 acre feet. As of April 10, NSMR storage is 119,241 acre feet. The NCPA Pool share of NSMR storage is 63,086 acre feet.
- Combined Calaveras Project generation for the Pool in March totaled 83.7 GWh, up from 58.0 GWh in February and more than the pre-month forecast of 73.2 GWh. Through April 10th, Calaveras generation for the Pool (23.8 GWh) indicates it will likely end near the month's forecast of 71.6 GWh.
- Western Base Resource (BR) Pool delivery Pool in March was 75.4 GWh compared to the forecast of 60.5 GWh. Through April 9, BR pool allocations at 23.3 GWh, well on the way to beating the latest April forecast of 62.9 GWh.
- PG&E City-Gate gas index most recently traded at \$3.39/MMBtu for April 6th delivery compared to an average of \$3.141/MMBtu with a high of \$3.26/MMBtu for the month of March. Gas prices rose 15% during March as production lags and large late-season storage withdrawals have the market worried over summer demand.
- Day-ahead HLH (on-peak) NP15 electricity prices remain low on average with spikes occurring on days with highest load and negative prices on weekends. The HLH and LLH day-ahead average LMPs for April 10 delivery were \$29.37 and \$22.78/MWh respectively.

NCPA Pool Loads & Resources Value Summary									
Peak and Energy Summary Mar-17					Estimated Production Costs		Cost of Serving Demand		
Demand	Coincident Peak (MW)	Total MWh	Forecast Values	Avg. MW	NCPA Pool		Totals	Avg (\$/MWh)

Apr-17				CY2021	38.86	37.58
May-17				CY2022	39.49	38.22
Jun-17				CY2023	41.12	39.85

NOTES TO SUMMARY TABLE:

Peak and Energy Summary:

* Monthly generation summary of Coincidental Peak (hour in which pool demand peaked), total MWh for the month, and pre-month forecasted values for report period.
 * Generation totals are for POOL SHARE of the projects.
 * Hydro totals include Collierville and Spicer generation.

Estimated Production Costs:

* Fixed project costs not included except for WAPA, where total month's project costs are used to calculate the average unit cost.
 * STIG and CT costs include forward natural gas and basis hedge transactions.
 * STIG & CT costs reflect \$2.60 and \$1.62/MWh variable O&M costs per 6-12-06 GSCA.

Cost of Serving Demand:

Compares price of meeting total monthly demand with (1) Hourly pool market clearing price; (2) Variable cost of pool gen. Pool Gen is sum of estimated costs divided by sum of generation.

NCPA POOL RESOURCES 2016-17 FISCAL YEAR: Jul-March 2017 Actual - bal Forecast

Industry Restructuring, Contracts and Interconnection Affairs

Resource Adequacy Compliance Filings

- NCPA made the following Resource Adequacy compliance filings with the CAISO for the compliance period June 2017:
 - Monthly System Resource Adequacy Demonstration (filed April 13, 2017)
 - Monthly Supply Plan (filed April 13, 2017)

Industry Restructuring

NCPA is actively participating in a number of CAISO stakeholder initiatives on behalf of the members. The follow is a brief description of the current active initiatives:

Commitment Costs and Bidding Enhancements

- Through this initiative the CAISO will evaluate the following two topics: (1) if commitment proxy costs, generated bids, and default energy bids allow scheduling coordinators to accurately reflect and recover their generators' unit-specific costs; and (2) if changes to the economic bidding of commitment costs and associated market power mitigation methodology could increase market benefits when bidding under competitive market dynamics.

Transmission Access Charge Options

- The current CAISO transmission access charge is a two-part rate for each megawatt hour of internal load and exports and is used to recover transmission revenue requirements. Revenue requirements for facilities rated 200 kV and above are recovered through a system-wide rate, while requirements for facilities rated below 200 kV are recovered via specific rates for each participating transmission owner. This initiative will determine if the same structure would be appropriate should a transmission owner with a load service territory join the CAISO as a new participating transmission owner.

Regional Resource Adequacy

- This initiative will evaluate resource adequacy tariff provisions appropriate for use in a regional ISO balancing authority area that encompasses multiple states. NCPA's main objective in this initiative will be to preserve the members' local control and unique treatment as a load-following MSS.

Bid Cost Recovery Enhancements

- In this initiative CAISO is evaluating changes to the way IFM and Real-Time Market Bid Cost Recovery (BCR) costs are allocated to market participants. More specifically, CAISO is evaluating if the Self-Scheduling offset currently incorporated into the IFM BCR should be removed, and if Real-Time Market BCR costs should be allocated using a two (2) tier mechanism. As a market participant who is exposed to BCR costs, NCPA has an interest in this stakeholder process; therefore, NCPA will closely monitor the development of this initiative.

Review of TAC Structure

- As described in the CAISO 2017 Stakeholder Initiative Catalog, during calendar year 2017 the CAISO will conduct a stakeholder initiative process to consider possible changes to the structure of the Transmission Access Charge (TAC). The CAISO currently charges the TAC to each MWh of metered internal end-use load (i.e., Gross Load) and exports, to recover participating transmission owners' costs of owning, operating and maintaining transmission facilities under CAISO operational control. Included in the initiative scope will be questions such as: (1) whether the current purely volumetric TAC rate structure should be retained, or should be changed to include other factors such as peak demand; and (2) whether the billing determinant for internal load should be modified to account for the load that is offset by the energy output of Distributed Energy Resources (DER).

Western

Western Base Resource Tracking (NCPA Pool)

Western Base Resource Tracking - NCPA Pool							
	Actual			Costs & Rates			
	BR Forecast ¹ (MWh)	BR Delivered (MWh)	Difference (MWh)	Base Resource & Restoration Fund (\$)	Monthly Cost of BR ² (\$/MWh)	CAISO LMP Differential ³ (\$/MWh)	12-Mo Rolling Avg. Cost of BR ⁴ (\$/MWh)

Jun-17	76,360	-	(76,360)	\$2,279,529	\$ 29.85	\$ -	\$ 30.95
1/	As forecasted in NCPA 16/17 Budget						
2/	= (Western Cost + Restoration Fund)/BR Delivered, for Pool Participants only.						
3/	= (MEEA LMP - PG&E LAP LMP) using public market information (i.e. not settlement quality).						
4/	Based on BR Delivered (Actual) when available and BR Forecast in all other cases. Includes CAISO LMP impact.						

- MEEA pricing (market efficiency enhancement agreement) producing a savings of approximately \$1,930 for the Pool in March 2017. The displacement program was not active.

Debt and Financial Management

- The Federal Reserve (Fed) raised its benchmark for short-term rates in March as expected. The new target for Fed funds was increased by 0.25% to a range of 0.75% to 1%. In their accompanying statement, the Federal Open Market Committee (FOMC) indicated that “the labor market has continued to strengthen and that economic activity has continued to expand at a moderate pace.”
- The Fed rate hike effected shorter U.S. Treasury maturities, but the rest of the curve ended the month largely unchanged from February. As investors interpreted communications issued by the Fed as signaling by the Fed as signaling a gradual path of tightening, intermediate-and longer-term yields reversed their early 2017 gains.
- Municipal new issuance declined in March with a 29.9% drop in long-term bond sales to \$29.8 billion from \$42.5 billion the same month last year. This was due largely to a significant decrease in refundings which were down 57.5% to \$7.5 billion from \$17.7 billion the same month last year. Year-to-date (YTD) long-term sales are down 12.1% to \$87.9 billion from \$100 billion in the same period last year, according to the Municipal Market Monitor (TM3) data.

Schedule Coordination Goals

Software Development

- After a successful deployment of the Scheduling Software Suite for BART's BRT1 SCID (Scheduling Coordinator ID), the MEID SCID scheduling was successfully implemented beginning with the 03/24/2017 operating date in the Real-Time Market and with the 03/25/2017 operating date in the Day-Ahead Market. IS staff has also deployed, in the test environment, the new Santa Clara's 'SNCL' SCID for its non-MSS (Metered Sub-System) portfolio. The Scheduling Software Suite includes MARS (Member and Resource System) database, Deal Manager application, Prescheduler application, PAGES (Power Agency Grid Energy Scheduler) application and TABS (Trading and Bidding System) application.
- IS Staff continues to perform research and development on the utilization of Business Intelligence software technology to provide better data analysis capabilities to both internal staff and members. Prototypes are being developed to demonstrate the capabilities and the usefulness of the technology.

Network

- Work continues on preparing to migrate e-mail from on premise to Office 365. A few early adopters in the Information Services group have moved their mailboxes and are testing out the functionality. Ops and Support are working with vendors to extract old mail and import into a new archiving solution. Plan to be completed with the migration in the coming months.

- Additional collaboration sites are being created to expand the functionality of the Agency's new extranet, "NCPA Connect. This will provide further capabilities to share and edit documents for specific working groups and committees.
- Information Services is currently recruiting for a Cyber Security student intern position to help with enhancing and executing a cyber-incident response procedure for the Agency and its members. Work is expected to begin this summer.
- Work continued throughout March in preparation for onboarding the Merced Irrigation District MEID scheduling coordination portfolio into the Agency's bidding, scheduling, and metering systems. Network communications have been configured and currently working with MEID staff to receive the correct set points that will be used in dispatch operations. Successfully deployed MID's Merced Falls hydro resource into the new MEID scheduling coordination portfolio effective on March 24, 2017, with operational SCADA telemetry and metering.

NCPA Bills & Settlements

Progress Against the Strategic Plan

Adjusted Power bills, which include CAISO transactions, invoiced to members the following month subsequent to the monthly pre-billed ARB month. Timely ARB settlements adjustments help improve members' cash flow and reconciliation of their budget performance.

The April 2017 NCPA All Resources Bill (ARB) monthly invoice sent to members on March 24, 2017 contains:

- April 2017 monthly pre-billed budget/forecast amounts;
- February 2017 (1st Adjustment) NCPA Project and CAISO Initial settlement true-ups;
- January 2017 (2nd Adjustment) NCPA Project settlement true-up and T+12 business day recalculated CAISO settlement true-up allocations;
- November 2016 (3rd Adjustment) T+55 business day recalculated CAISO settlement true-up allocations and NCPA Projects true-up;
- May 2016 (4th Adjustment) T+9 month recalculated CAISO settlement true-up allocations;
- July 2015 (5th Adjustment) T+18 month recalculated CAISO settlement true-up allocations;
- February 2014 (6th Adjustment) T+35 month CAISO settlement true-up

Legislative & Regulatory

Political Arena State/Federal/Western Programs

- NCPA is working closely with the California Air Resources Board (CARB) and the Joint Utility Group to ensure that greenhouse gas allowances continue to be freely provided to electric utilities in a post-2020 cap-and-trade program. In response to several months of negotiations, CARB has agreed to modify its cap-and-trade regulations amendment package so that NCPA members would receive nearly 17 million freely allocated allowances between 2021 and 2030. Even if the carbon price remains at minimum levels, these allowances would provide at least \$365 million in allowance value to NCPA member utilities during that time period. CARB expects to incorporate these changes to the cap-and-trade regulations within the next month, with CARB Board consideration scheduled for June.
- NCPA has been developing positions, negotiating amendments, and testifying on several energy-related bills in the state legislature. Since mid-March, both the Senate and the Assembly have been holding policy committee hearings on bills in the house of origin. The deadline for a bill to pass the house of origin is June 2nd. Major legislative issues include the future of the Cap and Trade Program, a 100% Renewables Portfolio Standard, energy storage incentives, a clean peak energy standard, programs focused on multi-unit housing, and intervener compensation. Issues that have not materialized in bills, but NCPA is monitoring, are regionalization and net energy metering expansion.

Human Resources

Hires:

None

Intern Hires:

Annette Zamudio joined NCPA on March 13, 2017, as a Student Assistant I for the City of Lompoc. Annette is pursuing an Engineering degree at Allan Hancock College in Lompoc, CA.

Promotions/Position Changes:

None

Separations:

John Koos, Environmental Health & Safety Specialist, resigned from his position at the Geothermal Facilities. John, who had worked at NCPA since December 2009, left for another employment opportunity.

Vinnie Venethongkham, Engineer III, resigned from his position at the Lodi Energy Center. Vinnie, who had worked at NCPA since November 2009, left for another employment opportunity in the power industry.
