

Debt and Interest Rate Management Report
As of December 31, 2014

December 31, 2014

Highlights

- No new debt or or any new swap agreements were entered into during the last six months and no new issues are planned.
- No fixed or variable rate debt or interest rate swaps were refinanced or terminated in the last six months.
- No material changes to any fixed rate debt, variable rate debt or outstanding swap agreements occurred during the last six months.
- The last six months included a reduction in the amount of reimbursement received from the Federal government for Build America Bond (BAB) subsidies related to the Lodi Energy Center BAB issues. Total reduction was 7.3% or \$244,233 due to sequestration of federal budget dollars.
- Notices were filed with the bond reporting depository (EMMA) as required for annual filing of continuing disclosure documents by NCPA
- In September/October 2014, Standard & Poor's reviewed NCPA's project ratings for the select bonds they rate and confirmed the current ratings:
 - Hydroelectric Project bonds affirmed at A+, stable outlook
 - Geothermal Project bonds affirmed at A-, stable outlook
 - Lodi Energy Center Issue One bonds affirmed at A-, stable outlook
 - Lodi Energy Center Issue Two bonds (CDWR) affirmed at AAA, stable outlook
 - Capital Facilities bonds affirmed at A-, stable outlook
- Fees paid to Citi for remarketing the Variable Rate bonds remained the same. In September we replaced Citibank as the provider of the letter of credit support with Bank of Montreal and agreed to a five year contract with lower fees (11 basis point reduction).
- Citigroup, our swap counterparty had no change in their credit ratings over the last six months; no collateral posting was required by any counterparty during the last six months.
- No defaults under any swap agreements have occurred during the last six months.
- Fair value on remaining outstanding swaps changed from a negative value of \$18.4 million on June 30, 2014 to a negative \$21.1 million on December 31, 2014.
- Interest rate swaps continue to perform better than expected and variable rates remain very low and in line with the market.
- Upcoming events:
 - Nothing to report

No defaults under the above swap agreements have occurred

No planned swap transactions at this time

Fair value on remaining outstanding swaps changed from a negative value of \$18.4 million on June 30, 2014 to a negative value of \$21.1 million on December 31, 2014.

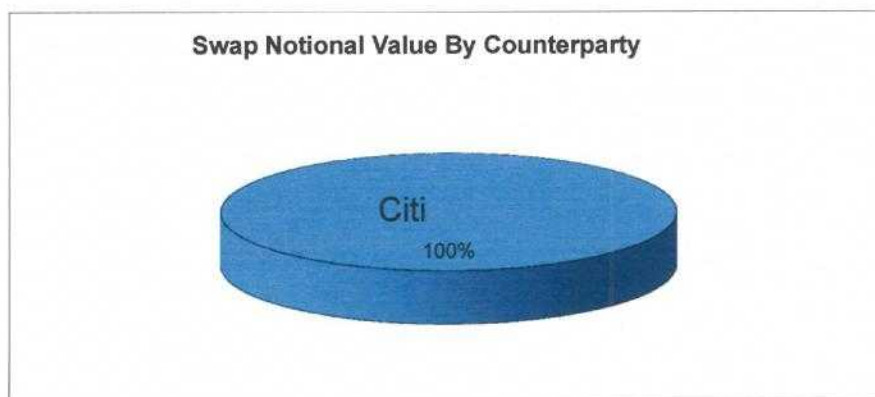

The valuations of derivatives transactions provided by PFM are indicative values based on mid-market levels as of the close of business on the date they are provided. These valuations are provided for information purposes only and are intended solely for internal use. These valuations do not represent the actual terms at which new transactions could be entered into or the actual terms at which existing transactions could be liquidated. The valuations provided are derived from proprietary models based upon well-recognized financial principles and reasonable estimates about relevant future market conditions. Valuations based on other models or different assumptions may yield different results. PFM believes its valuation methodology to be consistent with accepted practice in the market for interest rate swaps. Additional information is available on request. Information herein is believed to be reliable, but PFM does not warrant its completeness or accuracy. PFM does not hold a position or act as a market maker in the financial instruments of any issuer discussed herein.

Northern California Power Agency Hydroelectric Project Swaps Value Trend

Extreme market volatility and low treasury rates have greatly impacted the mark to market value of the swaps over the last several years. Rates have decreased over the last six months increasing the negative mark to market value which prevents refinancing of the swaps at this time.
