# Report on Current Financial Market Conditions or Issues 

## Recent Tax-Exempt Benchmark Yield Curve Movement

Key Takeaway: Interest rates are lower than a few months ago

## Current Interest Rate Snapshot

| August 7, 2017 |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| 6-Year | 2023 | - | 1.32\% | 1.43\% | 0.11\% | 1.74\% | 0.42\% | 21-Year | 2038 | - | 2.58\% | 2.80\% | 0.22\% | 3.11\% | 0.53\% |
| 7-Year | 2024 | - | 1.48\% | 1.61\% | 0.13\% | 1.93\% | 0.45\% | 22-Year | 2039 | - | 2.61\% | 2.83\% | 0.22\% | 3.14\% | 0.53\% |
| 8-Year | 2025 | - | 1.64\% | 1.80\% | 0.16\% | 2.12\% | 0.48\% | 23-Year | 2040 | - | 2.63\% | 2.85\% | 0.22\% | 3.16\% | 0.53\% |
| 9-Year | 2026 | - | 1.78\% | 1.96\% | 0.18\% | 2.28\% | 0.50\% | 24-Year | 2041 | - | 2.65\% | 2.87\% | 0.22\% | 3.18\% | 0.53\% |
| 10-Year | 2027 | 2.45\% | 1.93\% | 2.12\% | 0.19\% | 2.45\% | 0.52\% | 25-Year | 2042 | - | 2.67\% | 2.89\% | 0.22\% | 3.20\% | 0.53\% |
| 11-Year | 2028 | - | 2.03\% | 2.24\% | 0.21\% | 2.57\% | 0.54\% | 26-Year | 2043 | - | 2.69\% | 2.91\% | 0.22\% | 3.22\% | 0.53\% |
| 12-Year | 2029 | - | 2.13\% | 2.35\% | 0.22\% | 2.67\% | 0.54\% | 27-Year | 2044 | - | 2.70\% | 2.92\% | 0.22\% | 3.23\% | 0.53\% |
| 13-Year | 2030 | - | 2.21\% | 2.43\% | 0.22\% | 2.75\% | 0.54\% | 28-Year | 2045 | - | 2.71\% | 2.93\% | 0.22\% | 3.24\% | 0.53\% |
| 14-Year | 2031 | - | 2.28\% | 2.50\% | 0.22\% | 2.82\% | 0.54\% | 29-Year | 2046 | - | 2.72\% | 2.94\% | 0.22\% | 3.25\% | 0.53\% |
| 15-Year | 2032 | 2.75\% | 2.35\% | 2.57\% | 0.22\% | 2.89\% | 0.54\% | 30-Year | 2047 | 3.05\% | 2.73\% | 2.95\% | 0.22\% | 3.26\% | 0.53\% |

Key Takeaway: Interest rates and spreads remain attractive

## Municipal Market Supply and Demand

- After record issuance in 2016, YTD issuance has fallen ~13\% with supply in July ~19\% lower. Municipal bond funds have continued to report net cash inflows

Recent Issuance Volume and Municipal Fund Flows

Key Takeaway: Lack of supply is keeping rates low

[^0]
## AAA MMD Position (Since Inception)

| Minimum | 0.11\% | 0.25\% | 0.36\% | 0.44\% | 0.62\% | 0.89\% | 1.29\% | 1.57\% | 1.80\% | 1.88\% | 1.93\% |
| Maximum | 3.64\% | 3.66\% | 3.70\% | 3.74\% | 3.79\% | 4.22\% | 4.86\% | 5.47\% | 5.74\% | 5.88\% | 5.94\% |
| \% of Time Lower | 80.77\% | 75.16\% | 68.03\% | 55.93\% | 38.62\% | 25.52\% | 23.88\% | 20.87\% | 15.67\% | 10.18\% | 10.14\% |

Key Takeaway: Rates continue to be in a good position for NCPA's borrowing needs and refinancing opportunities

## SIFMA and 1-Month LIBOR Rate Movement

- SIFMA and LIBOR remained relatively flat throughout July

Key Takeaway: NCPA's variable rate portfolio continues to benefit from these low rates

## Interest Rate Forecasts

- Market participants continue to call for an increase in interest rates as shown in the data compiled by Bloomberg below

|  | The Street's Interest Rate Forecast <br> (As of August 7, 2017) |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Average Forecasts | Current | Q3 17 | Q4 17 | Q1 18 | Q2 18 | Q3 18 | Q4 18 |
| 30-Year UST | $2.83 \%$ | $3.00 \%$ | $3.17 \%$ | $3.30 \%$ | $3.41 \%$ | $3.51 \%$ | $3.61 \%$ |
| 10-Year UST | $2.26 \%$ | $2.42 \%$ | $2.58 \%$ | $2.71 \%$ | $2.82 \%$ | $2.93 \%$ | $3.09 \%$ |
| 2-Year UST | $1.35 \%$ | $1.52 \%$ | $1.70 \%$ | $1.84 \%$ | $2.02 \%$ | $2.16 \%$ | $2.33 \%$ |
| 3M LIBOR | $1.31 \%$ | $1.40 \%$ | $1.58 \%$ | $1.76 \%$ | $1.96 \%$ | $2.12 \%$ | $2.29 \%$ |
| Fed Funds Target Rate <br> (Upper) | $1.25 \%$ | $1.25 \%$ | $1.50 \%$ | $1.65 \%$ | $1.85 \%$ | $2.00 \%$ | $2.15 \%$ |
| Fed Funds Target Rate <br> (Lower) | $1.00 \%$ | $1.01 \%$ | $1.24 \%$ | $1.38 \%$ | $1.61 \%$ | $1.74 \%$ | $1.90 \%$ |

Key Takeaway: Wall Street expects one more rate hike this year

## Resets on NCPA's Hydroelectric Project 2008 Series A \& B Bonds

- As a result of the increase in short-term rates, NCPA's Hydroelectric 2008 Series A and B Bonds have also been resetting higher; however, they continue to trade well versus benchmarks and have been hedged with interest rate swaps

Key Takeaway: NCPA variable rate bonds have been resetting at or better than benchmark rates

## LIBOR Phase-Out

- The U.K. Financial Conduct Authority (FCA) recently announced its intention to phase-out LIBOR by the end of 2021
- There will be ongoing support for LIBOR through this deadline to allow for an orderly transition to alternative reference rates
- The International Swaps and Derivatives Association (ISDA) has yet to make a formal announcement regarding any alternative reference rates
- There is some speculation an alternative rate to LIBOR could be based on the U.S. Treasury repurchase ("repo") market, called the "Broad Treasuries Repo Financing Rate"
- This rate would be based on the borrowing of short-term cash (overnight) with U.S. Treasury bonds serving as collateral, and would be published by the U.S. Federal Reserve
- Any speculation regarding alternative reference rates are merely preliminary
- It remains unclear whether current swap and loan contracts that utilize LIBOR as the reference rate will be amended or allowed to mature
- Some market analysts anticipate that LIBOR will continue to be used alongside the new benchmark, even after the supposed 2021 phase-out
- At the moment, the only known fact is that nothing is definitive

Key Takeaway: LIBOR to be phased out by 2021. No action required currently.

# Plan for LIBOR Phase Out Announced by U.K.'s Top Financial Regulator 

Market, Regulators Seek Transaction-based Alternatives

Issuer Insight August 2017

## Drama-Rich, Data-Poor LIBOR Benchmark Planned to Expire in 2021

In a speech at Bloomberg's London office, Andrew Bailey, the head of the U.K. Financial Conduct Authority (FCA), a regulator of financial services firms and financial markets in the U.K., stated that the FCA will plan for the phase out of LIBOR with a target end to the index in $2021 .{ }^{1} \mathrm{He}$ concluded his speech with ongoing support for LIBOR through 2021 to allow for an orderly transition to alternative reference rates that are firmly based on market transactions. ${ }^{2}$ The benchmark, also known as the London interbank offered rate, is used for interest rate calculations for approximately $\$ 350$ trillion in securities worldwide. ${ }^{3}$ The global financial markets' reliance on LIBOR is widespread, and includes securities, products and instruments such as mortgages, derivative contracts, car, student and consumer loans, credit cards and a subset of municipal debt, to name just a few.

While the planned phase out of LIBOR was clearly stated in Bailey's speech, the financial governing bodies which ultimately drive such decisions, such as the FCA in the U.K. and the International Swaps and Derivatives Association (ISDA), have not issued formal directives or plans. LIBOR's current administrator, the Intercontinental Exchange (ICE), intends to continue publishing LIBOR rates, while acknowledging that Bailey's comments will promote a transition from the current LIBOR to an "evolving, ...long-term sustainable future" for LIBOR. ${ }^{4}$ Despite the uncertainty surrounding a specific timeline or how markets will handle the implementation of a replacement, many regulators are well underway considering replacements. In the U.S., the Alternative Reference Rates Committee (ARRC) recommended in June an alternative rate to LIBOR that would be based on the U.S. Treasury repurchase ("repo") market - called the "broad Treasuries repo financing rate." This rate would be based on the borrowing of short-term cash (overnight) with U.S. Treasury bonds serving as collateral, and would be published by the U.S. Federal Reserve.
The move away from the current reliance on LIBOR seems to be motivated by a desire for rates grounded in an index based on actual transactions executed in the market and not prone to manipulation by participants, as has been the case for LIBOR. Investigators and regulators found that leading up to and during the 2008 financial crisis a small number of banks and bankers involved in setting the daily LIBOR rate were colluding on the daily indications for LIBOR's reset to specifically benefit their positions and holdings. These findings resulted in several convictions and over $\$ 9$ billion in fines paid by the banks involved.

[^1]While LIBOR rates represent a taxable rate index, it is also widely used in the tax-exempt market. In the municipal market, LIBOR is most commonly used in interest-rate swaps and floating-rate, both publically issued and privately placed bonds, notes and loans. Often times, the LIBOR rate is modified to approximate a tax-exempt proxy (e.g., utilizing a percentage of the resetting LIBOR rate) and/or used as a base rate with a credit spread added to it, to represent the credit quality of borrowers and lender costs of capital.

## U.S. Fed Still Configuring a Replacement

Both the pervasive nature of LIBOR and its use in swaps meant as interest rate hedges complicates a speedy replacement. The Federal Reserve-sponsored ARRC has been considering the issue since 2014. Their directive is to "identify a set of alternative reference interest rates that are more firmly based on transactions from a robust underlying market and that comply with emerging standards such as the International Organization of Securities Commissions (IOSCO) Principles for Financial Benchmarks and to identify an adoption plan with means to facilitate the acceptance and use of these alternative reference rates." ${ }^{5}$

Based on a June 22, 2017 press release, ${ }^{6}$ the ARRC is further along on the first half of its mission than the second. They have selected a preferred replacement - named Broad Treasuries Repo Financing Rate. ${ }^{7}$ It would be based on the cost of overnight loans that use U.S. government debt as collateral. Since publishing that report, and in light of the FCA's planned phase out of LIBOR, the ARRC plans to refine its proposed transition plan and publish a final report before the end of the year.

At the moment, the only known fact is that nothing is definitive. The ARRC is fielding comments from the public on the planned U.S. replacement rate for LIBOR. Analysts and market participants still have questions on whether and how a new benchmark could be effectively utilized and transitioned to in the broad universe of products and securities that currently rely on LIBOR. How current contracts and products will address future changes to LIBOR or competing benchmarks with the LIBOR index remains to be seen.

## Municipal Issuers Should Plan for Alternatives

Should LIBOR cease to exist or cease to be used as a reliable rate index, all products that use the index (including derivatives and swaps, bonds, notes and loans) will need to address the transition to an alternative rate. Issuers should work with their financial advisors, legal counsel and related parties with which they have outstanding contracts (e.g., swap counterparties, loan providers, etc.) to prepare for an orderly transition and settle on terms for this transition that are the least onerous and costly. Issuers should pay special attention to changes to referenced indexes that trigger events, such as a reissuance, in which terminations and potential payments could be involved. While direct action is not necessitated at the current time - LIBOR has not yet been discontinued - issuers should begin to put a team in place to discuss risks, options and solutions.

5 Alternative Reference Rates Committee - Federal Reserve Bank of New York. Accessed August 03, 2017. https://www.newyorkfed. org/arrc.
6 Alternative Reference Rates Committee. "The ARRC Selects a Broad Repo Rate as its Preferred Alternative Reference Rate." News release, June 22, 2017. Accessed August 3, 2017. https://www.newyorkfed.org/medialibrary/microsites/arrc/files/2017/ARRC-press-release-Jun-22-2017.pdf.
7 Alternative Reference Rates Committee. "The ARRC Selects a Broad Repo Rate as its Preferred Alternative Reference Rate." News release, June 22, 2017. Accessed August 3, 2017. https://www.newyorkfed.org/medialibrary/microsites/arrc/files/2017/ARRC-press-release-Jun-22-2017.pdf.

Additionally, issuers in the process of finalizing transactions that use LIBOR in any fashion should structure the related terms and agreements to allow for an orderly and flexible transition to an alternate rate, minimizing disruption and potential negative impacts to the issuer itself. While the market's eventual transition away from LIBOR is uncertain, issuers should work with their financing team to build in the flexibility to address future changes and potential replacements related to this index.

PFM's Financial Advisory business is the nation's leading independent municipal advisor. ${ }^{8}$ We are prepared to assist our clients in their navigation of this market change with fiduciary advice that places our client's interests above all others.

## FY2018 Update: Effect of Sequestration on State \& Local Government Filers of Form 8038-CP

Pursuant to the requirements of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, refund payments to certain state and local government filers claiming refundable credits under section 6431 of the Internal Revenue Code applicable to certain qualified bonds are subject to sequestration.

Refund payments processed on or after October 1, 2017 and on or before September 30, 2018 are reduced by the fiscal year 2018 sequestration rate of 6.6 percent, regardless of when the amounts claimed by an issuer on any Form 8038 -CP was filed with the IRS. The sequestration reduction rate will be applied until a law is enacted that cancels or otherwise impacts sequestration.

These reductions apply to Build America Bonds, Qualified School Construction Bonds, Qualified Zone Academy Bonds, New Clean Renewable Energy Bonds, and Qualified Energy Conservation Bonds for which the issuer elected to receive a direct credit subsidy pursuant to section 6431.

Issuers should complete Form 8038-CP in the manner provided by the Form 8038-CP Instructions, and will be notified through correspondence that a portion of their requested payment was subject to the sequester reduction.

Issuers with any questions about the status of refunds claimed on Form 8038-CP, including any sequester reduction, should contact IRS Customer Account Services at 1-877-829-5500.

Yearly Sequestration Rate Reduction

| Fiscal Year (October 1 thru September 30) | Sequestration Rate Reduction |
| :---: | :---: |
| 2018 | $6.6 \%$ |
| 2017 | $6.9 \%$ |
| 2016 | $6.8 \%$ |
| 2015 | $7.3 \%$ |
| 2014 | $7.2 \%$ |
| 2013 | $8.7 \%$ |

## NCPA Refunding Opportunities

## Hydroelectric Project | Refunding Overview

- Hydroelectric Project Number One Revenue Bonds, 2008 Refunding Series C
- Callable at par on July 1, 2018
- Majority not advance refundable with tax-exempt bonds (only ~13\% advance refundable)
- Bonds can be refunded with tax-exempt bonds on a forward delivery basis or advance refunded with taxable bonds
- Refunded bonds secured by debt service reserve funded with a surety
- Procuring a new reserve fund surety for the refunding bonds is likely problematic
- If a cash funded reserve is required, it will impact the annual cash flow savings of the refunding
- It may be possible to issue the bonds without a debt service reserve
- A forward refunding would have a significant amount of additional administrative and execution requirements that a traditional refunding would not
- Sophisticated investor letters
- Larger lot sizes - minimum of \$100,000
- Two "closings" with associated documentation and administration
- Estimated forward premiums of 15 to 30 bps
- The 2008 Series C bonds can be current refunded as early as April 3, 2018

Key Takeaway: NCPA should begin the process to current refund the Series 2008C Bonds

## Hydroelectric Project | Refunding Overview (Cont’d)

- Comparison of expected results for tax-exempt forward and taxable advance refundings with no debt service reserve and with debt service reserve at $25 \%$ of maximum annual debt service, given current market rates
- Maturities providing a minimum present value savings of $5 \%$ of refunded par

|  | Tax-Exempt Forward Refunding |  | Taxable Advance Refunding |  |
| :--- | ---: | ---: | ---: | ---: | ---: |
| Debt Service Reserve | $\mathbf{2 5 \%}$ of MADS | None | $\mathbf{2 5 \%}$ of MADS | None |
| Par Amount of Refunded Bonds | $\$ 65,920,000$ | $\$ 65,920,000$ | $\$ 54,115,000$ | $\$ 54,115,000$ |
| Present Value Savings | $\$ 7,347,000$ | $\$ 7,348,000$ | $\$ 4,576,000$ | $\$ 4,566,000$ |
| PV Savings as a Pct of Ref'd Par | $11.15 \%$ | $11.15 \%$ | $8.46 \%$ | $8.44 \%$ |
| Average Annual Cash Flow Savings | $\$ 606,000$ | $\$ 1,285,000$ | $\$ 77,000$ | $\$ 749,000$ |

Note: rounded to nearest \$1,000

Debt Service Schedule

## Lodi Energy Center, Issue One | Refunding Overview

- Lodi Energy Center Revenue Bonds, Issue One, 2010 Series A
- Callable June 1, 2020
- Originally issued to fund new capital projects and are advance refundable with tax-exempt bonds
- Refunded bonds are secured with a cash funded debt service reserve
- Using a 5\% present values savings threshold, $\$ 29.5$ million bonds meet the savings target in the current market
- Expected present value savings is $\$ 2.4$ million, or $8.01 \%$ of refunded par
- Average expected annual cash flow savings is $\$ 325,000$

Key Takeaway: Series 2010A Bonds would generate decent refunding savings, however, long escrow and small size warrant considering Direct Purchase options and/or waiting

## Hydroelectric Project Descriptive Overview

| Descriptive Overview of Hydroelectric Project |  |
| :---: | :---: |
| Description | Series of five Hydroelectric Generating Stations on the North Fork of the Stanislaus River |
| Location | Murphys, CA |
| Type | Base load and peaking capacity |
| Fuel | Water |
| Generation Capacity | - Collierville: 253 MW (2 @ 126.5 MW) <br> - Spicer: 6 MW (2 @ 2.75 MW, 1 @ 0.5 MW) |
| Other Facilities | - Collierville: 40 miles of Transmission Line, 2,065 Acre Feet of storage at McKays Reservoir <br> - Spicer: 189,000 Acre Feet of storage at Spicer |
| First Year in Operation | 1990 |
| License | Through 2032 with option to extend |
| Highlights | - Offers firm, renewable, emission free source of power to help stabilize other intermittent renewable sources such as solar and wind, and integrate all into a more effective resource mix <br> - Zero Carbon Energy Credit for entire output <br> - AB32 emission requirements do not apply <br> - 6 MWs of CEC Qualified Renewable Energy |

 AgencyRefunding Update \& New Money Analysis

June 16, 2017

RBC Capital Markets, LLC ("RBCCM"), seeks to serve as an underwriter on a future transaction and not as a financial advisor or municipal advisor. The information provided is for discussion purposes only in anticipation of being engaged to serve as an underwriter. The primary role of an underwriter is to purchase securities with a view to distribution in an arm's-length commercial transaction with the issuer. The underwriter has financial and other interests that differ from those of the Issuer. RBC CM is not recommending an action to you as the municipal entity or obligated person. RBCCM is not acting as an advisor to you and does not owe a fiduciary duty pursuant to Section 15B of the Exchange Act to you with respect to the information and material contained in this communication. RBCCM is acting for its own interests. You should discuss any information and material contained in this communication with any and all internal or external advisors and experts that you deem appropriate before acting on this information or material.
This presentation was prepared exclusively for the benefit of and internal use by the recipient for the purpose of considering the transaction or transactions contemplated herein. This presentation is confidential and proprietary to RBCCM and may not be disclosed, reproduced, distributed or used for any other purpose by the recipient without RBCCM's express written consent.
By acceptance of these materials, and notwithstanding any other express or implied agreement, arrangement, or understanding to the contrary, RBCCM, its affiliates and the recipient agree that the recipient (and its employees, representatives, and other agents) may disclose to any and all persons, without limitation of any kind from the commencement of discussions, the tax treatment, structure or strategy of the transaction and any fact that may be relevant to understanding such treatment, structure or strategy, and all materials of any kind (including opinions or other tax analyses) that are provided to the recipient relating to such tax treatment, structure, or strategy.
The information and any analyses contained in this presentation are taken from, or based upon, information obtained from the recipient or from publicly available sources, the completeness and accuracy of which has not been independently verified, and cannot be assured by RBCCM. The information and any analyses in these materials reflect prevailing conditions and RBCCM's views as of this date, all of which are subject to change.
To the extent projections and financial analyses are set forth herein, they may be based on estimated financial performance prepared by or in consultation with the recipient and are intended only to suggest reasonable ranges of results. The printed presentation is incomplete without reference to the oral presentation or other written materials that supplement it.
IRS Circular 230 Disclosure: RBC CM and its affiliates do not provide tax advice and nothing contained herein should be construed as tax advice. Any discussion of U.S. tax matters contained herein (including any attachments) (i) was not intended or written to be used, and cannot be used, by you for the purpose of avoiding tax penalties; and (ii) was written in connection with the promotion or marketing of the matters addressed herein. Accordingly, you should seek advice based upon your particular circumstances from an independent tax advisor.

| Total Outstanding |  |  |  |  |  | \$1,096,345,000 | \$763,755,000 |

- Both series of VRDBs are supported with credit facilities through 2019
- These bonds have been swapped to a fixed rate through 2032

## Hydroelectric Project 2008 Refunding Series C - Refunding Analysis

## A forward delivery refunding generates over $\$ 7.7$ million of present value savings under current market conditions

- The 2008 Refunding Series C Bonds are callable on July 1, 2018
- These bonds are not eligible to be advance refunded on a tax-exempt basis until April 2018
- They can be refunded on a forward basis (tax-exempt) or on a taxable basis at any time
- Subject to a detailed tax analysis, a small portion of the bonds may be eligible for tax-exempt refunding
- Under current market conditions, a forward delivery transaction locks in an attractive interest rate level and eliminates interest rate risk
- The forward premium is estimated to be 6 basis points per month; the refunding analysis assumes a seven month forward period
- Savings are shown on a level basis; given that there are principal maturities in 2018 and 2019, savings can be shaped or accelerated to meet specific cash flow targets
- Savings results: the forward refunding generates $\$ 7.7$ million or $10 \%$ present value savings or $\$ 1.3$ million annually

| Comparison of Refunding Results |
| :--- | | Forward |  |  |

Annual Cash Flow Savings

1) Represent Sinking fund maturities of 2025 term bond

Note: Information regarding advance refundability is subject to the opinion of bond counsel. Assumes refunding with fixed rate bonds issued under market conditions as of June 13,2017

## New Money Overview

Interest rates continue to be attractive for funding capital projects

- Funding capital expenditures from bond proceeds spreads the costs over the estimated useful life of the assets
- Using bond proceeds to fund capital projects frees cash reserves for other purposes such as pension expenses
- Results:
- \$30 million Project Fund Deposit
- 10-Year, level debt service structure
. DSRF Deposit: \$1.17 million
- $\$ 3.5$ million in annual debt service costs
- All-in TIC: 1.97\%
- Issuing bonds also allows for costs to be allocated levelly across years
